EDUCATION

Dr. A.P.J. Abdul Kalam Technical University
Computer Science B.tech
CGPA: 7.56

Varanasi
2021 - 2025

EXPERIENCE

Provana Private Limited | Process Analyst

Noida | February 2026 - April 2026

- Processed and analyzed high-volume U.S. loan datasets using SQL, Excel, CLS Software, maintaining data accuracy, consistency, and completeness.
- Validated, reconciled, and audited customer and loan records to identify discrepancies, correct data inconsistencies, and maintain data integrity.
- Coordinated with team members to execute data workflows efficiently and adapt to evolving process.

Elgoss | Software Developer

Varanasi | August 2025 - October 2025

- Built a Visitor Data Management web application using Python and Flask, enabling secure storage and retrieval of visitor information.
- Implemented Aadhaar and PAN card scanning features using OCR for identity verification. Designed RESTful routes, integrated MongoDB for backend storage, and ensured data integrity with form validations and session management.

SKILLS

Programming Languages: HTML, CSS, JavaScript
Libraries/Frameworks: React.js, Node.js, Express.js
Tools / Platforms: VS Code, Git & GitHub, Postman, RAG, Gemini
Databases: SQL, MongoDB, Qdrant

PROJECTS / OPEN-SOURCE

Chat with PDF using RAG | [Link](#)

JavaScript, Node.js, Express.js, Google Gemini API, Qdrant

- Built a RAG-based(Retrieval-Augmented Generation) PDF Question Answering API using Express.js, pdf-parse, Google Gemini, and Qdrant.
- Implemented PDF text extraction and chunking, generated embeddings for document content and user queries, stored vectors in Qdrant, performed similarity search to retrieve relevant context, and generated context-aware answers using Gemini.

Recipe App | [Link](#)

React.js, Node.js, Express.js, MongoDB, JWT and Bcrypt

- FullStack Recipe App built using React.js, Node.js, Express.js, MongoDB and JWT authentication.
- This App allows users to create their profile, login, add new recipes, view other's recipes and save recipes including user authentication.

E-commerce API with Authentication | [Link](#)

Node.js, Express.js, MongoDB, JWT and Bcrypt

- E-commerce REST API built using Node.js, Express.js, MongoDB, and JWT authentication.
- This project provides a complete backend solution for an e-commerce platform, including user authentication, product management, and cart functionalities.

CERTIFICATIONS

- Web-Development training - **Internshala**
- SQL for Beginners - **SimpliLearn**
