EDUCATION

Kashi Institute of Technology
Computer Science B.tech
CGPA: 7.56

Varanasi
2021 - 2025

EXPERIENCE

Provana Private Limited | Process Analyst

Noida | February 2026 - April 2026

- Analyzed and processed U.S. loan-related documents in line with established business procedures.
- Verified customer and loan details, ensuring records were complete and error-free.
- Collaborated with team members to ensure smooth workflow and timely completion of assigned tasks and worked effectively in a fast-paced environment while adapting to new process changes

Elgoss | Software Developer

Varanasi | August 2025 - October 2025

- Built a Visitor Data Management web application using Python and Flask, enabling secure storage and retrieval of visitor information.
- Implemented Aadhaar and PAN card scanning features using OCR for identity verification. Designed RESTful routes, integrated MongoDB for backend storage, and ensured data integrity with form validations and session management.

SKILLS

Programming Languages: HTML, CSS, JavaScript
Libraries/Frameworks: React.js, Node.js, Express.js, Tailwind CSS
Tools / Platforms: VS Code, Git & GitHub, Postman, MongoDB Compass
Databases: SQL, MongoDB

PROJECTS / OPEN-SOURCE

Recipe App | [Link](#)

React.js, Node.js, Express.js, MongoDB, JWT and Bcrypt

- FullStack Recipe App built using React.js, Node.js, Express.js, MongoDB and JWT authentication.
- This App allows users to create their profile, login, add new recipes, view other's recipes and save recipes including user authentication.

E-commerce API with Authentication | [Link](#)

Node.js, Express.js, MongoDB, JWT and Bcrypt

- E-commerce REST API built using Node.js, Express.js, MongoDB, and JWT authentication.
- This project provides a complete backend solution for an e-commerce platform, including user authentication, product management, and cart functionalities.

To-Do App (Voice command) | [Link](#)

HTML, CSS, JavaScript, Web Speech API (SpeechRecognition)

- Developed a voice-enabled To-Do List application using HTML, CSS, and JavaScript that allows users to add and manage tasks through speech recognition.
- Implemented DOM manipulation for real-time task updates, enhancing accessibility and user experience

CERTIFICATIONS

- Web-Development training - **Internshala**
- SQL for Beginners - **SimpliLearn**
